Boring game! Redundant. This is far from the type of simulation expected. Not worth it! Don't spend your money on this game.. Not enough hotkeys, basically played with one hand only which feels very wrong in an rts game.. You're lucky you guys didn't turn out like this.. OUR GOD IS AN AWESOME GOD. Very fun game. The premise is so easy anyone can pick it up and play it. You are the God and you destroy the tower without killing the people. That is it, very simple. That is what makes this game great. Lots of levels to play. I suggest this game for anyone that is looking for a puzzle game with something different involved!. If you're looking for a simple but enjoyable futuristic racing game this one fits the bill. Speaking of bills, I wouldn't pay full price for it but if you see it on sale it's worth a snag if you're a fan of this genre. The game could definitely use some track variety as everything ends up kind of looking the same, and the graphics and weapons aren't anything to be too wowed by, but the soundtrack is pretty awesome electronic tunes, and the gameplay is at least fluid and fast-paced. The soundtrack and speed of the game are what redeems it from being average.. wow racist hes litcherally hitler . There isn't much to say about this soundtrack besides buy it, it's worth the dosh. If you enjoy Jet Set's style, and can imagine a shiny neon version of that genre, this soundtrack will not disappoint in the slightest.

Hideki Naganuma created two tracks that sound like love letters to Jet Set in addition to the music that Cedric created that unmistakably matches Hover's aesthetic.

I give it 5/500000 because numerical ratings are overrated: buy this soundtrack.

Does not work, don't waste your time. Steam makes it VERY hard to get a refund. If the game actually worked I would give it 3 stars. If it worked and had a random map generator or more than five (yes only 5!!!) skirmish maps, it would be 5 stars..  
Enthralling story, interesting characters, challenging fights/puzzles.

A bit buggy.. Great game. Ofcourse it's far from perfect, but with the big improvement in AI races are more realistic, and that's what the game should be about. That interface and other things maybe didn't improve much from 2017 just shows they had to use the resources for what's most important, and that's the gameplay which to me proved the good choice.

Would recommend the game if you are NEW and existing because of the improvement. Pros:

- Great art style
- Lots of humor
- Nice music
- Interesting world and characters
- Innovative game mechanics

Cons:

- Game is too short
- Puzzles are easy, with blatant hints everywhere
- Transitions between characters are too slow
- The world could have been explained and developed much more

. -Pay to Win

-Only jeeps or heavy tanks on mode TANKS

-at zombie mode only example miniguns.. THIS. GAME. ROCKS! 🎮. Uplink, but simplified and boring. That's all you need to know about this.

The long version? It's a copy of uplink, with much simpler mechanics in terms of what you do.

I got bored rather quickly, as things consist of "Find this thing that you can hack, then QTE tap buttons to get passwords to hack into it"

It's not a bad game per say, just very simple. After Uplink, I wouldn't recommend this.
