NEW PRODUCTS

PRODUCT OF THE MONTH

TRIPP LITE—PR-Series DC Power Supplies

Tripp Lite's new PR-Series DC power supplies are housed in a handsome dark metal cabinet that blends in with modern amateur radio and communications equipment, giving an integrated, professional appearance to any radio or electronics installation. Ideal for powering practically all types of 12 VDC equipment, the PR-Series combines good looks with exceptional performance for base or mobile radios, test equipment, and other electronic gear. Continuous-duty performance stands up to extended periods of reliable operation. These power supplies provide excellent IC voltage regulation, automatic overcurrent protection and full line-isolation.

The PR-Series DC Power Supplies are available in 3 to 60 amp sizes, with suggested retail prices starting at $38.50. For more information, contact *Tripp Lite, 500 N. Orleans, Chicago IL 60610-4188. Telephone: (312) 329–1777; FAX (312) 644–6505.* Or Circle Reader Service No. 201.

TIARE PUBLICATIONS

Tiare Publications has released a new *Great Radio Reads* catalog, #5. Now expanded to 20 pages, this catalog features nearly 30 Tiare books and products, as well as over 50 books and products from other publishers and manufacturers.

This new 5th edition of *Great Radio Reads* is available for $1 from *Tiare Publications, P.O. Box 493, Lake Geneva WI 53147; (414) 248–4845.* It is also enclosed free with all orders. Or circle Reader Service No. 208.

IDC COMMUNICATIONS

The WBA1500 from IDC Communications is a wideband mast-mounted RF preamplifier designed for use with wideband receivers, scanners, or even TVs and stereos, to improve performance and make up for long antenna cable runs. The WBA1500 covers 2 MHz through 1.5 GHz. A bench-type version, WBA1500B, is also available for frequency counters, oscilloscopes, spectrum analyzers, and related test equipment. The WBA1500 system comes complete with amplifier module, DC supply module, AC adapter, and BNC connectors ("F" type jacks are also available). The WBA1500 sells for $78, and the bench-top model for $57, postpaid. Contact *IDC Communications, 2745 Winnetka Ave. N., Suite 205A, New Hope MN 55427; (612) 888–7456.* Or circle Reader Service No. 205.

ELECTRON PROCESSING

Electron Processing is now offering a pair of high-quality keying devices. The Green Lake paddle and key are individually hand-crafted by a master machinist and designed to withstand rigors and abuse that would destroy many other paddles. They are made of solid brass on a polished brass base (bakelite on the straight key), and they come with either hand-rubbed wood handles or polished aluminum handles. The Green Lake products are priced at $90 for the keyer paddle with wood handles, $100 with aluminum; $70 for the straight key with wood handle, $75 with aluminum. The S & H charge is $5. Electron Processing is also offering a new shortwave wire antenna, the Multiwire-4. For more information contact *Electron Processing, Inc., P.O. Box 68, Cedar MI 49621; (616) 228–7020.* Or circle Reader Service No. 204.

AZIMUTH COMMUNICATIONS

The new WeatherStar Master Weather Station ALT6 will help you monitor weather conditions with functions that give you barometric pressure (in. or mm), altitude, wind speed (MPH/KPH), wind gust record, wind direction (2 & 10 degree increments), daily and yearly rain (0.1" increments), an optional self-emptying rain gauge, inside temperature (with alarm), outside temperature (with alarm and min/max temperature record), wind chill factor, time of day (12/24 hour with alarm), and programmable scanning of functions. The ALT6 lets you set an alarm to warn of excessive wind gusts around your antennas and QTH.

The WeatherStar Master ALT6 is priced at $300, plus $7.50 for shipping. The optional self-emptying rain gauge (RG3) is $50. Contact *Azimuth Communications Corp., 3612 Alta Vista Ave., Santa Rosa CA 95409; (707) 577–8007, FAX (707) 573–1482.* Or circle Reader Service No. 206.

DELTA RESEARCH

DELTACOMM Version 1.04 from Delta Research is a state-of-the-art communication manager for the ICOM IC-R7000. Unlike similar products on the market that merely control the receiver, DELTACOMM 1.04 includes a custom MS-DOS interface for control, plus a comprehensive set of software communication tools to analyze, log and generate reports from the data. The spectrum log function can sweep a frequency spectrum at approximately 1300 channels/minute, generate a histogram, and log frequency/activity to the disk.

DELTACOMM 1.04 is priced at $300 (including external interface and components for cabling), plus $4 S & H. Contact *Delta Research, P.O. Box 13677, Wauwatosa WI 53213; (414) 353–4567.* Or circle Reader Service No. 203.

RUTLAND ARRAYS

Rutland Arrays has announced a new antenna, Model RA7-50. Model RA7-50 is a 7-element, 26'7" long, 50 MHz yagi antenna. It has a measured gain of 10.5 dB over a dipole, and matches the performance of other antennas measuring as much as 7' longer. The sidelobes have been lowered to 22 dB below the main lobe, and the F/B ratio is 30 dB at 50.2 MHz. The design features stainless steel element hardware, extruded aluminum element mounts, a T-match driven element with silver-plated, Teflon™-insulated phasing line, and 90+ MPH wind survival. A waterproof N-type coax connector is standard. For the price and more information, contact *Rutland Arrays, 1703 Warren St., New Cumberland PA 17070; (717) 774–5298 (7–10 p.m. EST).* Or circle Reader Service No. 207.

SPECTRUM INTERNATIONAL

Spectrum International is now importing and distributing a complete weather satellite receiving system, including a PC controller, from Time Step Electronics of Great Britain. Instead of using a downconverter from 1691 to 137 MHz, then feeding the signal into a 137 MHz receiver, the new 1691 MHz design uses a dedicated 1691 MHz receiver. The companion low noise GaAsFET preamplifier has increased gain and better filtering than earlier models. The new system also has a companion decoder board (IBM-PC compatible, short-slot "half-card") and software.

The 1691 MHz preamplifier is $175, the receiver is $450, and the decoder board with software is $300. For more information, contact *Spectrum International, P.O. Box 1084, Concord MA 01742; (508) 263–2145.* Or circle Reader Service No. 202.
